## Module Learning Environment

A practical and hands-on teaching and learning environment is fostered through participative lectures and individual or group-work based tutorials. Moodle is used extensively to support learners beyond the face-to-face encounters. Online videos, quizzes, additional readings, glossaries and discussion forums are key aspects of the module delivery and formative assessment for learners.

## Module Teaching and Learning Strategy

This module is delivered through formal and participative lectures and tutorials. Lectures are dynamic and interactive with the use of PowerPoint presentations, guest lecturers, videos, case studies, group discussion and debate. Tutorials allow learners to apply techniques, learned in the lectures, individually or in groups, to resolving related issues using current relevant case study information. Learners are required to undertake extensive reading of assigned material prior to class, and then encouraged to participate in discussions and group work by expressing opinions and asking questions. Particular emphasis is placed on the practical application of concepts and theories central to auditing. Learners also have access to Moodle, Griffith College's Virtual Learning Environment.

## Module Assessment Strategy

20% of the marks are allocated to course work. This may involve essay writing, cases and problem solving, report writing, presentations. This may assess one or more of the module learning outcomes. The remaining 80% is allocated to an end of semester closed book examination which requires learners to complete five questions from a possible six. The questions will contain both theory and practical elements and many of the module learning outcomes could be assessed in the exam.
