6.14.2 Module aims and objectives

The module examines the role played by global leadership and management in organisations (commercial, public and voluntary) and organisational culture. There are contested and competing views (both in theory and in practice) about both management and leadership: about what they are; and about how leadership affects management.

The module encourages learners to critically examine global leadership and management models. They are given the opportunity to consider models with which they are familiar, or of which they have had experience; to gain knowledge and understanding of new international models; to consider how they might modify their own current or future leadership and management behaviours; and to recognise the importance of continuous development in global leadership and management roles.

6.14.3 Minimum intended module learning outcomes

On successful completion of this module, learners are able to:

- (i) Critically explore and interrogate prominent leadership theories and apply these theories in the course of addressing a variety of organisational issues and problems.
- (ii) Critically evaluate the significance of the role played by organisational culture and recognise the wide range of leadership and management models and behaviour in place globally.

- (iii) Reflect purposefully and critically upon their own skills and limitations as leaders and managers, evidenced by their performance in working with groups.
- (iv) Analyse the power of politics, authority and empowerment play in organisations; how leaders and managers employ these concepts in practice; and how learners can employ them in their current and future roles.
- (v) Formulate strategies within the limits, contradictions and emerging issues related to leadership and management.

6.14.4 Rationale for inclusion of the module in the programme and its contribution to the overall MIPLOs

Success in this dynamic global environment requires an enlightened cadre of leaders and managers, who have depth in their specific disciplines, as well as a keen understanding of how their work meets the needs of society, business, industry and government.

Nurturing tomorrow's leaders and managers requires an enriched college environment attained by bridging the culture of academe with the culture of the marketplace while building on the strengths of both. The development of the global and digital economies has led to a rapid integration of markets and indeed of consumer behaviour.

Leadership and management behaviours however, have not always kept pace; they vary from the very traditional and autocratic - which remain the norm in many cultures and societies, and are still common in manufacturing industry worldwide, to inclusive, empowering and gender neutral forms of management behaviour, which are characteristic of modern, innovative, knowledge based organisations.

6.14.5 Information provided to learners about the module

The Programme Handbook contains the module descriptor and assessment details. Extensive use of the VLE, Moodle, provides detailed notes and additional resources. In class, learners are provided with a PowerPoint pack and extensive reading list, incorporating professional and academic sources.

6.14.12 Specifications for module staffing requirements

Lecturing staff should hold a master's Level (Level 9) qualification in management or related discipline, with at least 5 years working in a management or consultant related role. Preferably with a third level teaching qualification (e.g. Certificate in Training and Education).

6.14.13 Module summative assessment strategy

Leadership and Management is characterised by high level communication skills and an ability to engage with others at all levels in organisations. Learners are given an overview of candidates selected for promotion. They are required to suggest a personal and leadership development plan using course concepts and practical knowledge and ideas alongside evidence of reflective thinking in relation to learning and development for each candidate. On submission, learners are asked to present their report.

The assessed work breakdown can be seen in the table below.

No	Description	MIMLOs	Weighting
1	Personal and leadership development plan	i, ii, iv, v	80%
2	Reflective Log/Self-Evaluation	iii, iv	10%
3	Presentation (board room style)	i, ii	10%
