

Hot Water

The water tanks in the apartments are timed on an immersion. The immersion is set to come on at peak times throughout the day so that there should be hot water at all times. The immersion comes on at the following times:

06:00am – 09:00am

12:00pm – 13:00pm

18:00pm – 22:00pm

During these times the water is heated and remains hot until the water is used. There should be enough hot water in the morning for all four residents of the apartment to take a 10-minute shower. The water is then heated again from 12pm to 1pm which should provide enough hot water for the rest of the day. The immersion then comes on again from 18:00 – 22:00 providing enough hot water to last until the morning. If you have no hot water in the morning or evening then you should report it to the accommodation office in the office (or to Security on weekends on 086 818 2370) as it may be due to a maintenance issue.

If you have any questions regarding this or would like to change the times of the immersion then please come to the Accommodation Office and let us know.
