Web Developer – full time

Role summary:

Are you a web developer seeking a new challenge? Griffith College, Ireland's largest independent third level college, is currently recruiting for a web developer to join its IT team.

The College is at an exciting point in its growth and development. This position offers the right candidate an opportunity to play a key role in ensuring the College provides the highest level of service to our existing and potential customers.

The ideal candidate will have 3+ years' experience in a similar role, with strong programming skills.

Role Responsibilities

- Lead developer for web based projects. You will be responsible for the College's websites including coding, content management systems and hosting.
- Working with internal departments to spec, design and deploy new functionality to www.griffith.ie (Drupal CMS) and other related in-house LAMP based sites to meet the College's requirements.
- Liaising with in-House and Agency staff for aesthetic and brand coherence.
- Multi-tasking on several projects, working to deadlines
- Wide Range of tasks from small to large projects, modifications to existing platforms to developing new solutions from scratch.
- Working with a wide range of technologies, software and platforms.

Role Requirements

- Strong understanding of and experience with PHP, HTML5, CSS, MySQL, JavaScript or similar technologies.
- Strong understanding of security concepts and ability to implement mitigation techniques – XSS, CSFR, password salting etc.
- Strong adherence to test driven development methods.
- Experience with LAMP.
- Excellent communication skills.
- Ability to quickly learn, understand, test, and debug an inherited codebase.
- Good people skills and the ability to work in a team environment and be proactive.
- Understanding of good code documentation practices and tools.
- Bachelor's degree in computer science or equivalent industry experience.

Desirable skills

- Experience in developing websites with Drupal.
- Experience with Google Tag Manager.
- Experience with automated testing tools, e.g. Selenium.
- Experience in performance analysis and enhancement, reducing page load times etc.
- Experience with web analytics
- Experience with version control systems, GIT.

Remuneration

Commensurate with experience.

Benefits

- On site gym, restaurant, laundry, 5-a-side pitch.
- Laptop.
- Free on-site parking.
- Social club.
- 20 days annual leave plus 1 to be taken on Good Friday.
