

Enterprise Ireland National Graduate Programme

Software Developer

Role Description:

This is a two-year graduate placement position for a software developer within the Business Process Improvement & Information Technology (BPI & IT) Department of Enterprise Ireland. The successful candidate will work with an experienced team of software professionals in the delivery of business applications and websites using leading-edge technology for Enterprise Ireland.

The Role of Business Process Improvement & Information Technology (BPI & IT) Department is as follows:

- Manage and support Enterprise Ireland's portfolio of Information Systems.
- Drive efficiencies and operational excellence across our core business operations, applying lean principles to business process management.
- Deliver and continuously develop web platforms including online client services.
- Develop technology platforms to support client engagement, knowledge sharing and collaboration.

Role Responsibilities:

- Work as a software developer within the BPI&IT Department of Enterprise Ireland.
- Assist in the design, coding and test of technical solutions for Enterprise Ireland's portfolio of business applications and websites.
- Deliver excellent code in a fast-paced development environment, responding quickly to business needs with technical solutions.
- Create and maintain technical documentation and assist in development of development standards.
- Keep up to date on emerging technologies/industry trends and apply them into operations and activities

About Enterprise Ireland

Enterprise Ireland is the government organisation responsible for the development and growth of Irish enterprises in world markets. We work in partnership with Irish enterprises to help them start, grow, innovate and win export sales on global markets. In this way, we support sustainable economic growth, regional development and secure employment.

Enterprise Ireland works with entrepreneurs and business people across the full business development spectrum - from early-stage entrepreneurs, to established business owners and large Irish multinational companies.

Role Requirements:

- Relevant 3rd Level qualification in Information Technology a minimum of a 2.2 degree (level NFQI Level 8).
- IT Skills Requirements
 - A good understanding of OOP and design patterns and an understanding of the principals of unit testing and agile development methodologies.
 - Experience with software development using the Microsoft Web Stack, ASP.NET MVC or Core, C#, Entity Framework and SQL Server.
 - Good working knowledge of front end technologies including HTML5, CSS3 (Bootstrap or Foundation) and JavaScript particularly Ajax and JQuery, knowledge of SPA frameworks such as Reactjs, Vue or Angular would be a bonus.
 - Familiarity with Content Management Systems such as WordPress or similar would be an advantage.
- Demonstrate the ability to provide innovative solutions in relation to software design and functionality.
- Strong work ethic; self-starter & highly motivated.
- Ability to meet & exceed project deadlines & milestones.
- A Team Player with strong interpersonal and communication skills.
- Must be committed to self-development and be enthusiastic about acquiring new skills.
- We look for strong academic performance. You must have completed your degree between January 2017 to August 2019.
- You must be available to start the role in late August 2019.
- Eligibility to work under an Irish contract of employment for the two-year duration of the programme is essential.

Application and Selection Process

- Application will close at mid-night on Friday 17th May 2019
- Placement on Enterprise Ireland's Graduate Programme 2019-2021 will be subject to verification of meeting the eligibility criteria, along with short-listing and competency assessment throughout the recruitment, selection and placement stages, as appropriate.
- Assessments may include online questionnaires/testing, video or telephone interview and interview/presentation participation.
- Successful graduates joining Enterprise Ireland on the Graduate Programme 2019-2021 will begin their internship in late August 2019.
