

**Title**

Football Analyst

**Description**

**InStat** provides statistic and analytical solutions for football leagues, clubs, and players around the globe.

As an intern at InStat, you will be given a role of an analyst in our analytical department.

This is a unique opportunity for students or recent graduates of Irish universities – you will get unique knowledge of the backstage of the industry and gain an invaluable experience in the sports environment that few companies in the world can provide. Working in our company will give you a chance to show off your communication and analytic skills as well as allow you to gain a real insight into our industry. Following an initial training period, our interns dive straight into their placements to work for not only clubs but even national teams.

**The three best perks of this position are:**

- **Working in the football industry;**
- **Getting experience in analytical writing;**
- **Doing real work.**

This position will require a lot from you regarding football knowledge and commitment.

Our company's analysts do the fascinating work; a dream job for many football fans, you could be the one given a chance to have it. The employees of the Analysis Department advise professionals on how to correct the mistakes made in recent matches or on how to beat their next opponent. Their texts land on the desks of coaches, academies, club management and of national teams' officials all over the world. Working in InStat's Analysis Department gets you intimately closer to the world of professional football.

We have unique highly technological products that have a great value and are being used by more than 1000 teams over the world, as well as players, media, agents. Among our clients, you will find not only the top clubs such as "Manchester United", "Real Madrid", "Bayern Munich" and so on but also lower league clubs and even colleges.

After extensive training in performance analysis and all analytical products by top-level employees, you will be given your own analytical work to do.

To succeed you will be doing tactical and stats analysis of games played by our clients, analysis of clients' next opponents, scouting analysis of individual players and so on.

You will learn how to interact with different types of stats data and tactical aspects of football matches, how to interpret various stats figures, how to point out trends in the performance of players and teams.

Even though you will be supervised, once you become familiar with the "ins and outs" of the job you will pretty much make all the decisions by yourself, because performance analyst position is not a repetitive technical activity, it is a sort of handicraft which requires specific intelligent work.

Sounds like something you would love to experience? Then here is what we want from you.

**Skills and areas**

An intern will gain experience in analytical activities, such as stats data analysis, observation of tactical aspects of game, figuring out crucial stats, investigation of modern football game trends, working with high-tech products, complex problem solving, searching for specific data, working in a multinational team, presentation skills, working within deadlines and most importantly working in analytical team.

Not only that but you will also learn how to analyze strengths and weaknesses of different players, evaluate their potential and viability of transfer to specific clubs, compare players based on stats and your analysis of their videos, scout a player for particular position for a club and how to analyze weak and strong spots in a team roster.

**This position would ideally suit students or recent graduates in the following areas:**

- Statistical data analysis;
- Performance analyst;
- Sports & fitness studies;
- IT development.

**Qualifications Details**

- Must be fluent in English;
- Must be able to work in Ireland legally;
- Must be in love with sports;
- Knowledge of other languages is an advantage, but not necessary.

On our end, we will provide the following training: time/task management, complex product training, statistical reports, analytical reports, fitness reports, video-analysis, searching for data, reporting.

**Payment**

the first three months of training are unpaid, but there is the possibility of a fulltime contract for the right candidates, upon completion of the internship.

**Mentor**

The Organization will assign a mentor and a trainer to support the Intern during the Internship.

**Location**

Roselawn House, National Technology Park, Limerick.
