

[the academy_of_code]

The Academy of Code is looking for new tutors!

Job Description

We have opportunities for **enthusiastic** new staff to join our team for midweek evening and Saturday morning classes in **Stillorgan, Raheny, Knocklyon, Malahide and Newbridge**. We are also looking for staff who may be available for new venues in the city centre and Dublin 15.

Tutors at the Academy of Code work with our students in a classroom setting, guiding them both as groups and 1:1 as they progress through their **programming journey**. We use a variety of languages including the Java-based Processing language, HTML, JavaScript, Python and more. (Tutors are expected to have a solid understanding of at least one relevant programming language, and the interest and drive to up-skill where required).

The ideal candidate must be enthusiastic and patient, comfortable working with students of all ages (8-18) and personalities. **Excellent communication skills** are required and the candidate must have the **confidence to lead** a class and deal directly with parents' questions and any other issues that arise.

Some programming experience is vital, while any teaching or childcare experience is a bonus. Candidates working towards technical degrees (eg computer science/engineering) are strongly preferred.

We are committed to investing in our staff – successful candidates will benefit from **dedicated training days**, as well as the opportunity to work with and learn from our senior staff. We are also committed to providing staff with the opportunity to grow in their roles. New staff will start in teaching assistant positions and will have plenty of opportunities to progress leading their own classes and contributing to curriculum development.

Probation pay is €10/hour, rising to €14/hour for those who successfully complete the probation period. Staff who progress with the company are eligible for performance and knowledge-based pay increases, with rates of €25+/hour available for top performing staff with 2+ years' experience.

If interested send your CV and cover note to diarmuid@theacademyofcode.com.
