

Vacancy: Junior CAD Technician

Company description

De'bros is a small, family-owned stone company; specialising in consultation and installation of a variety of residential and commercial stone projects in Ireland. De'bros works with natural and composite materials. At de'bros we template and install worktops and any solid surfaces requiring Quartz or Natural Stone. De'bros are involved from the tendering stage all the way to design, supply and fitting of stone surfaces.

Job description

Opportunity for a recently qualified graduate.

We are seeking a smart construction professional with a good knowledge of Auto CAD. This is a full time position. A junior CAD technician with de'bros will be responsible for producing and preparing drawings to specifications for stone installation. The successful candidate will be responsible for production lists and to work to meet the required schedule for our team of stone fitters.

Key activities for the role include:

- Producing CAD drawings for interiors
- Liaising with sales team for customer requirements
- Liaising with fabrication personnel
- Creating accurate and clear drawings in line with project requirements.
- Potential involvement in customer consultations.

The successful candidate will ideally have:

- Degree qualification or certificate diploma in a course that covers Construction CAD or equivalent
- Excellent CAD skills
- Ability to achieve a high level of accuracy
- Ability to interpret structural drawings
- Excellent communication and organisational skills
- A high level of IT literacy in Microsoft Office (Especially Excel)

We are looking for a driven and ambitious individual with great communication skills, a professional client-facing manner with impressive organisational skills and attention to detail. Experience or knowledge of the stone industry is a plus.

Remuneration will be based on candidates experience and knowledge.
